

# BRENTCOMBER

## EBB DOUBLE CUT

*As the tide ebbs, or recedes, coastal rock is left exposed to the elements. The Ebb Side Table represents that resilience and stability. It is a symbol of permanence in the ever-changing landscape. The clear finish highlights and maintains the colour, which can range from a deep copper to, more commonly, black. While some are consistent in colour, others contain small chance intrusions of differing rock types that were present as it formed, making each stone unique. It requires little maintenance, and excels in applications where durability is paramount, including outdoors.*

Each basalt stone is naturally unique in size, as such dimensions and weight may vary by piece.
