

ILLUMINATED SHATTERED DISC

With my Shattered Light collection, I've taken the concept of released energy one step further by embedding low voltage LED lights in the small fissures between the sections of wood of which these pieces are composed. This creates a luminosity that radiates from within the pieces, giving the impression that they are literally bristling with electricity and bursting with energy.

**Shown in western red cedar (40" Dia. x 3"D) with clear hardwax oil finish.*

This piece can be built up to 72" in diameter.
