

BRENTCOMBER

TAFONI DINING

The coastal shoreline is a unique place where land and ocean overlap. When the conditions are right, the persistent and unyielding tidal forces can carve soft caverns and organic hollows into the bedrock itself. Groupings of these sculptural rock formations are called Tafoni. Our Tafoni series celebrates this unique phenomenon that occurs on the border where land meets water.

* Base shown above with Scorched finish, option for clear. All bases are made from western red cedar, dimensions are 22"Dia. x 28.5"H.

* Shown above with 60" diameter Walnut top with Clear Hardwax finish
